

M O B E E L I

One platform to **unify** Indonesia's auto industry

An online parts marketplace for Indonesia's \$5.3B aftermarket —
every part verified to fit the buyer's exact car.

\$5.3B

INDONESIAN
MARKET (2025)

100K+

CAR WORKSHOPS

Built

PRODUCT STATUS

PRE-SEED • \$500K FOR 10% • JUNE 2026

Both buyers and sellers are losing in Indonesia's auto parts market

BUYER PROBLEMS

The buyer suffers silently

19.4%

RETURN RATE

86%

FITMENT ERRORS

- Orders wrong part — 19.4% return rate (86% fitment errors)
- Can't verify authenticity — real or KW?
- No protection when things go wrong
- Hours on WhatsApp asking "will this fit?"

"People are afraid to buy expensive things on Tokopedia because they don't know what they'll get."

— Field research, June 2026

SELLER PROBLEMS

The seller fights to survive

TOTAL PLATFORM COMMISSION

Tokopedia

17-20%

Mobeeli

5.0%

- Platform fees destroy margins — up to ~20% on Tokopedia
- COD fraud closes shops — can't fight back
- 3,000+ SKUs uploaded manually one by one
- Price wars they can't win vs Chinese dumping

"My shop was closed because of too many returns from COD. The platform penalized me. Not the customer."

— Shop owner, Senen Market

Sources:

- 19.4% return rate: [ServeRetail](#)
- 86% fitment errors: [Alhena AI](#)
- Tokopedia 16.75%–19.66% total commission (May 2026): [Platform Commission Policy](#) & [Dynamic Commission Policy](#)

Three ways auto parts buyers get burned today

PAIN #1

Wrong Part

Industry average 19.4% return rate. 86% caused by fitment errors. Mobeeli target: under 2%.

19.4%

INDUSTRY RETURN RATE

PAIN #2

Fake or Real?

No way to verify authenticity on generalist platforms. KW parts look identical to OEM in photos.

AUTH VERIFICATION TOOLS

PAIN #3

Info Overload

100,000+ sellers, no fitment guidance. Buyers Google chassis codes. Still guess wrong.

100K+

UNFILTERED SELLERS

"I WhatsApp sellers asking if a part fits my car. We both guess. Sometimes we're wrong."

— Car owner, Jakarta

Sources:

- 19.4% return rate: [ServeRetail](#)
- 86% fitment errors: [Alhena AI](#)
- Under 2% target (30% reduction post-fitment): [X-Cart](#)

Three crises destroying Indonesia's auto parts sellers

CRISIS #1

Platform Fees Eating Margins

SELLER'S TAKE-HOME PER RP 100,000 SALE

Tokopedia raised automotive commission. Combined with default fees, sellers now face 17–20% total commission.

"I had a Shopee order today. I calculated my price — I'd lose money. I cancelled it."

CRISIS #2

COD Fraud Closing Shops

Customers claim items weren't ordered. Return empty boxes with stones inside. Sellers get penalized. Shops actually close.

Returns ≠ Mistakes

Returns destroy businesses — not just cash flow.

CRISIS #3

3,000+ SKUs Manual Upload

Shop owners spend days manually entering product data. No time for business. Tech barrier stops many from going online.

3,000+

SKUs entered manually, one by one.

"It would make me dizzy to do it manually. I have over 3,000 SKUs."

Sources:

- Tokopedia 16.75%–19.66% total commission (May 2026): [Platform Commission Policy](#) & [Dynamic Commission Policy](#)
- Rp 650,000 cap & Growth Xtra (3.5%): [Sentrasoft Policy Review](#) & [Growth Xtra Terms](#)

Indonesia's first automotive-focused e-commerce platform

THIS PLATFORM

NEVER EXISTED BEFORE

Here's why no one built it

No YMM Database

No one had built a comprehensive Year-Make-Model database for Indonesian vehicles. Too much work. Too complex.

No Fitment Validation

Generalist platforms treat auto parts like shoes. Wrong model. No one invested in building fitment matching.

No AI Catalog Tools

Importing is hard. Shop owners (often 40+) can't manually upload thousands of SKUs. No automation existed.

No Fair Resolution

Platforms always favor buyers. Sellers have no recourse. No one built a system that investigates fairly.

"We want to help the pioneers — the long-time shops with loyal customers. They deserve better infrastructure."

— Mobeeli founders

Five moats we built that can't be copied overnight

✓ MAPPED · 190K+ RECORDS

The Fitment Graph

Every part tied to the exact cars it fits — 190K+ verified fitment records across 5,900+ vehicles and 71 makes, built from zero.

MOAT STRENGTH

3-5 YEARS

Requires OEM data + government registries + confirmed-fit corrections.

✓ DERIVED · REAL GEOMETRY

Physics-Based Fitment

Fit computed from real geometry — bolt pattern, bore, offset, tire size. Deterministic, not typed in by hand.

MOAT STRENGTH

18+ MONTHS

Geometry match from physics — no scraped table replicates it.

✓ BUILT · COMPOUNDING

Self-Correcting Data Loop

Every confirmed fit adds evidence to the graph. A scraped copy decays from day one — ours gets better with use.

MOAT STRENGTH

TIME-BASED

Buyer fit-confirmations feed the graph — live in production.

✓ GATED · AI POWERED

Gated AI Ingestion

Gemini AI reads supplier Excel/PDF sheets into the graph — through validation gates, not on trust. Zero manual work for sellers.

MOAT STRENGTH

18+ MONTHS

Custom validation rules + human-in-the-loop for edge cases.

✓ EXTRACTED · 98% COVERED

Own OE Spec Coverage

Factory specs for Indonesia's cars, extracted ourselves — 98% covered. Nothing to license: ACES covers the Americas, TecDoc hasn't reached Indonesia.

MOAT STRENGTH

COMPOUNDING

No off-the-shelf source existed — so we built the data ourselves.

THE SOLUTION

Mobeeli: Trust infrastructure for automotive e-commerce

We built the platform that validates fitment, protects both sides, and creates a fair marketplace for Indonesia's workshops and auto parts shops.

Fitment First

Best match, not cheapest price

<2%

RETURN RATE TARGET

Fair Protection

Both buyer and seller protected

2-SIDED

AI+HUMAN

VERIFICATION STACK

AI Powered

Catalog migration automated

GEMINI

AI ENGINE

"We removed price from the driver's seat. On Mobeeli, sellers win by fitting the right part. Not by cutting prices first."

How buyers win on Mobeeli

✗ Before Mobeeli

- Search 100,000+ products
- Guess chassis codes
- 19.4% chance of wrong part (industry avg)
- 86% of returns driven by fitment errors
- No recourse for fraud

✓ With Mobeeli

- See only compatible parts
- YMM does the work
- Under 2% wrong part rate
- Buyer protection active
- Fair resolution guaranteed

Sources:

- 19.4% return rate: [ServeRetail](#)
- 86% fitment errors: [Alhena AI](#)

How sellers win on Mobeeli

BENEFIT #1

AI Catalog Migration

Don't upload 3,000 products manually. Our AI reads your Excel/PDF and does it automatically. Go live in hours.

"I have over 3,000 SKUs. It would make me dizzy to do it manually."

BENEFIT #2

0% Early Adopter Fees

First 300 early adopters. 3 months at 0% guaranteed. After that, fees scale with your success — GMV threshold or Month 6. Save millions vs. Tokopedia's 17–20% total fees.

0% for first 3 months or GMV Threshold

BENEFIT #3

Fair Resolution

No more empty box returns. We investigate with video evidence. Sellers protected from COD fraud.

"We want to be fair. If someone cheats, they won't last."

BENEFIT #4

B2B2C Dropshipping

Connect to distributors. When you get an order, supplier ships directly. No inventory needed. No upfront capital.

Worry less about stock. Focus on customers.

Sources:

- Tokopedia 16.75%–19.66% total commission: [Platform Commission Policy](#) & [Dynamic Commission Policy](#)

The Mobeeli flywheel

Fitment-First Ranking

On Tokopedia, sellers win by cutting prices. On Mobeeli, sellers win by fitting the right part.

Algorithm ranks by fitment accuracy, not lowest price.

Data Compounding

Every confirmed fit teaches the YMM engine. Every supplier onboarded adds validation data. The moat grows over time.

More users = better data = better fitment = more users.

Real shops. Real conversations. Real demand.

"People asked about launch date before our conversation was even fully completed. We haven't launched yet."

— Survey Summary, June 2026

60

SHOPS APPROACHED

Field research across three Jakarta parts markets — Atrium Plaza Senen, Pusat Onderdil Pondok Cabe & MGK Mega Glodok Kemayoran

38

SIGNED UP FOR WAITING LIST

38 shops registered interest before platform launch. Waiting for our go-live to start selling.

17-20% → 0%

FEE SAVINGS

Early adopter program. Save vs. Tokopedia's 17-20% total commission.

Key Insight from Field Research

"A significant majority of online stores are operated by individuals under age 30. The primary reason: importing is challenging without experience."

Our AI importer addresses the #1 barrier preventing older shop owners from going digital.

Sources:

- Field research conducted June 2026 at Atrium Plaza Senen, Pusat Onderdil Pondok Cabe & MGK Mega Glodok Kemayoran, Jakarta

63% conversion rate. Before we even launched.

63%

Conversion Rate

38 out of 60 shops joined — across three Jakarta parts markets

DAY 1 RESULTS

What We Did

- Approached 60 shops across three markets
- No product ready yet
- Just a pitch and a promise
- Explained: 0% fees, YMM fitment, AI catalog

IMPLICATION

What It Means

- Shop owners are desperate for alternatives
- Tokopedia's double-fee hike (up to ~20% total) hurt them
- No convincing needed — they asked us to hurry
- Strongest pre-seed validation possible

"We haven't even launched yet, and shops are already signing up."

— Field Research, June 2026

Simple. Growing with the network.

PILLAR 1

Transaction Fee (5%)

Flat fee on completed orders. Buyer's funds protected until delivery confirmed. 0% for early adopters.

PILLAR 2

Logistics (1.2%)

Markup on shipping via integrated partners. Heavy cargo handled. One-click booking for mechanics.

PILLAR 3

SaaS Tiers (Add-on)

Premium tools + support for high-volume sellers. Growth · Pro · Enterprise. ~75% gross margin, recurring.

PILLAR 4

AdTech Engine (CPM/CPC)

Sponsored listings and banner placements sold to parts brands and distributors. Sellers bid for top-of-search visibility. Revenue scales directly with platform traffic.

PILLAR 5

Insurance

Embedded micro-insurance on high-value orders — shipping protection, product authenticity cover, and COD fraud indemnity. Premium split with underwriting partner.

Sources:

- Tokopedia 16.75%–19.66% total commission (May 2026): [Platform Commission Policy](#) & [Dynamic Commission Policy](#)

Fair by Design. Hybrid Fee Structure.

Every shop gets **3 months at 0%**. After that, fees scale with success — **whichever comes first**: GMV threshold OR Month 6.

TIER 1: ANCHORS (30)

Top Wholesalers

- **GMV Threshold:** Cumulative Rp 500M for 0%
- **At Month 6:** Start 2%, +1%/month
- **Benefits:** Advisory board, featured listings

TIER 2: EARLY (270)

Core Marketplace

- **GMV Threshold:** Cumulative Rp 20M for 0%
- **At Month 6:** Start 2%, +1%/month
- **Benefits:** Priority support, beta access

ARR Milestones (Base Case)

Three-Scenario Outlook at Month 18

SCENARIO	ARR	18-MO TOTAL
CONSERVATIVE	\$3.2M	\$2.1M
BASE CASE ★	\$5.5M	\$3.8M
UPSIDE	\$7.9M	\$5.8M

Conservative floor (\$3.2M) still supports Series A. Base case is our **most likely path**.

300

Early Adopters

\$3.8M

18-Mo Revenue

~4.8%

Blended Take

Why Hybrid? High-volume shops contribute sooner (GMV path). Low-volume shops still contribute by Month 6 (time floor). **No free riding.**

Three-Scenario Model: Base case (\$5.5M) uses 50% Anchor GMV penetration and 75–80% Growth acquisition with 2 dedicated FT salespeople. Upside (\$7.9M) if Anchors consolidate faster. Floor (\$3.2M) still Series A fundable.

Built for automotive. Not bolted on.

FEATURE	TOKOPEDIA / SHOPEE	MOBEELI ✓
YMM Fitment Validation	✗ None	✓ 190K+ verified records
Fitment-First Search Ranking	✗ Price-first	✓ Accuracy-first
Fair Return Resolution	✗ Buyer-only bias	✓ Both sides protected
AI Catalog Migration	✗ Manual upload only	✓ Gemini AI powered
Authenticity Verification Badges	✗ No verification	✓ AI + community
Seller Fee Structure	✗ 17–20% total	✓ 0% → 5% graduated

Why incumbents can't copy this

DATA MOAT

190K+ verified fitment records require OEM data + government registries + confirmed-fit corrections. **3–5 years to replicate.**

INTEGRATION DEPTH

YMM engine + Buyer Protection + AI + Logistics = complex system. **18+ months to rebuild.**

NETWORK LOCK-IN

Once mechanics build supplier relationships, switching costs compound over time. **Trust can't be faked.**

THE TEAM

Three founders. Skin in the game.

YAVET ARIMATHEA WIDJAJA

CEO & Founder

Runs market strategy and the seller program —
60 shops approached, 38 signed pre-launch.

STRATEGY

BUSINESS DEV

MUHAMMAD SALMAN AL HAFIZH

CTO & Co-Founder

Built the platform pre-funding — the fitment
graph, gated AI ingestion, and the marketplace.

FULL STACK

ARCHITECTURE

AI/ML

FERDINANSYAH HUSEIN

COO & Co-Founder

Runs operations and partnerships — logistics,
payments, and the wholesaler pipeline.

OPERATIONS

STRATEGY

"We built the product before seeking funding. 3 founders. 10+ years combined in this industry. We have skin in the game."

Building the infrastructure. Joining us?

\$500,000

Pre-Seed · 10% Equity · \$5M Post-Money · 18-Month Runway

- ✓ **300 Early Adopters** — 30 Anchors + 270 Early Adopters with hybrid fee model
- ✓ **\$5.5M ARR (Base Case)** — By Month 18 · \$7.9M upside · \$3.2M floor
- ✓ **\$3.8M Revenue** — 18-month cumulative (base case)
- ✓ **Series A Ready** — Positioned for \$3–8M raise at Month 18

What the funds enable

- Engineering team expansion (3 → 8)
- 2 dedicated FT salespeople from Month 1
- GTM in Jakarta & Java
- Payment & logistics integrations
- AI catalog development

Your edge as early investor

- First-mover in YMM fitment (190K+ verified fitment records)
- Field-validated demand — 63% conversion pre-launch
- Proven technical foundation, product already built
- Base case: \$5.5M ARR — our most likely path
- Strong founder alignment

THE ENDGAME

Fitment is the wedge. The vehicle graph is the destination.

Prove it in Indonesia, scale it at depth, then take the playbook across Southeast Asia — same fragmentation, same fitment gap.

STEP 1

Prove it in Indonesia

The hardest, biggest market in SEA. The playbook gets written here.

STEP 2

Scale Indonesia at depth

From the Jakarta pilot to national coverage — categories, cities, and the workshop network compound.

EARLIER PATH

Strategic exit

An acquirer like Astra or GoTo buys the fitment layer — the earlier, smaller outcome.

THE BIGGER PATH

PE consolidation → Southeast Asia

A private-equity buyout rolls the Indonesian playbook across SEA — same fragmentation, same fitment gap, country by country.

\$300M+

FOUNDER TARGET

Astra and GoTo are named as potential acquirers, not partners. Exit framing is the founders' target, not a projection.
